**CLINICIAN-RESEARCHER**

General Description:

A Faculty member whose major academic activity is research, regardless of the type of research.

Time Distribution:

Engaged in research, teaching and CPA activities for at least 80% of their professional time. The time commitment for research is 50% or greater.

Clinical Activities:

Since research is the primary academic contribution, these individuals generally have only 15-40% of their time committed to clinical service. Clinical care and research site will vary according to research and location of clinical practice.

The Clinician-Researcher will be expected to report to the Psychiatrist-in-Chief and the Department Chair any ongoing disciplinary proceedings by the College of Physicians and Surgeons of Ontario (or similar regulatory body in another jurisdiction). He/she will also be expected to report any criminal conviction against him/her.

Teaching Activities:

Responsible for dissemination of research at formal meetings. They are involved in the education of undergraduate students, postgraduate trainees, graduate students, CE participants and/or faculty development.

Research Activities:

This individual is expected to be a principal investigator and hold national, peer-reviewed operating grants (or major industry grants) to support their research program. There must be ongoing evidence of productivity in the form of peer-reviewed original research papers or equivalent contributions to the knowledge base of the discipline.

Administrative Activities:

Member of 1 or 2 university, departmental or hospital committees
