David M Clark is the Professor of Experimental Psychology at the University of Oxford. He is well-known for his pioneering work on the understanding and psychological treatment of anxiety disorders: especially panic disorder, social anxiety disorder, health anxiety and PTSD. Recently, he has also focused on how to disseminate effective psychological treatments within healthcare systems and is one of the architects of the English Improving Access to Psychological Therapies (IAPT) programme. Currently, the IAPT program treats around 560,000 people with depression or anxiety disorders each year and reports clinical outcomes on almost everyone. 2 in every 3 treated people reliably improve and 50% recover. David is the UK Government’s Clinical and Informatics Advisor for the program. He is a Fellow of the British Academy, the UK Academies of Medical Sciences and Social Sciences, and the Association for Psychological Science (USA).
Dr. Faith Gunning is an Associate Professor of Psychology in Psychiatry and the Vice Chair for Research and Psychology in Weill Cornell Medicine’s Department of Psychiatry. Dr. Gunning relies on advances in human neuroimaging techniques to inform the development and selection of novel interventions for depression. Much of her work focuses on the use of mobile technology to deliver neuro-biologically informed cognitive and behavioural interventions to individuals suffering from depression and anxiety.

Harriet Ekperigin (Ek-pe-ri-gin) is a Senior Business Lead with the Ontario Telemedicine Network. She is currently leading the provincial implementation of the Big White Wall. Harriet has consulted on and implemented several transformative local and provincial projects. Her previous roles include, HealthLink Lead in the Haldimand county, consultant with KPMG and a former manager in the mood and anxiety department at the Centre for Addiction and Mental Health responsible for inspiring the centralized intake process that led to a 40% reduction in wait times. Harriet holds a Bachelor’s degree in Nursing, a Master’s Degree in Business Administration and is Project Management Professional Certified.
Dr. Molyn Leszcz is Professor, Department of Psychiatry, University of Toronto.

Dr. Leszcz’s academic and clinical work has focused on improving integration in psychiatric care and broadening the application of psychotherapy within psychiatry. Dr. Leszcz’s research and publications have focused on group psychotherapy for individuals with cancer, and genetic or familial predisposition to cancer; group psychotherapy for patients with schizophrenia: evidence-based approaches to group therapy and modified interpersonal group psychotherapy for patients with substance abuse; and the application of psychological interventions to improve health care workers' wellness.

Dr. Leszcz is President-Elect of the American Group Psychotherapy Association and is a member of the International Board for Certification of Group Psychotherapists as well as the Editorial Committee of the International Journal of Group Psychotherapy.

Dr. Leszcz was awarded the Anne Alonso Award for Outstanding Contributions to Psychodynamic Group Therapy and also was awarded Distinguished Fellowship in the American Group Psychotherapy Association. Dr. Leszcz has been the recipient of a number of teaching awards at the University of Toronto.
Vikram Patel is The Pershing Square Professor of Global Health and Wellcome Trust Principal Research Fellow at the Harvard Medical School. His work spans the areas of mental health problems, child development and adolescent health in the global health context, in particular the use of community resources for assessment, prevention and recovery.

He co-founded Sangath, an Indian NGO which has won the MacArthur Foundation’s International Prize for Creative and Effective Institutions and the WHO Public Health Champion of India award. He co-founded the Movement for Global Mental Health and is a Fellow of the UK Academy of Medical Sciences. He was named in the TIME 100 most influential persons of the year in 2015.
